Astronomy A305 - Modern Observational Techniques
Lab Assignment 17

Special Project

This lab offers the option of carrying out a special project identified by the student. If you are interested in pursuing this option, prepare a proposal of what you want to do. Describe in detail what the science is, how you will carry it out, and what the results are likely to be. Also identify any special resources you will need to carry out the project and define what you would hand in at the end of the project for grading.

Your proposal should be about one page in length (typed, single spaced, 12-point font, 1" margins).
