

## **A575 HW #10**

NOTE: Please do this problem set by yourself, without consultation with your fellow classmates.

**Handed out: April 8, 2009**

**Due (via e-mail): April 15 at 5:00pm**

1. [50 pts]

Write 5 potential qualifier questions based on the material discussed in this class. Each question should be challenging enough that you expect it will take approximately 0.5 hours for your fellow classmates to answer it. Multiple questions that build on a common theme, or thought provoking questions that raise fundamental concepts are all good approaches.

You should consider this a good opportunity to review the entire class material to find common themes, threads of ideas, and fundamental concepts.

I will collect these questions via e-mail on Wednesday, and distribute them as an organized list of problems to be worked on during class time on April 20. You never know, good questions may appear on Exam 2, and/or the qualifier...
